SUMMARY

I'm a native Portuguese, driven to make a positive impact and grow, I approach life with an open mind and a genuine eagerness to learn. Collaboration, respect, and teamwork are values I hold. I eagerly tackle new challenges, continuously developing myself. With humility, drive, and a passion for personal growth, I make meaningful contributions in any setting. Self-motivated and focused on organization and efficiency, I strive to improve and streamline processes. Open to feedback, I embrace learning opportunities. A strong communicator, I convey ideas effectively to diverse groups, seeking to enhance my skills and build meaningful relationships.

WORK

Internship

September 2021 - May 2022

VILT Group, Braga, Portugal

- During my internship the goal was to design and develop an efficient search engine. The aim was to facilitate the information retrieval for company employees. Ensuring easy access to a wide range of intern resources and enhancing overall productivity.

Git

Java

ElasticSearch

PostgreSQL

Junior Consultant

June 2021 - June 2022

VILT Group, Braga, Portugal

- Until December there were a few projects for the Unit. So I kept learning and doing some training about Documentum and InfoArchive. After that I ended up in some projects developed in Java to work with Documentum
- Data migration
- Data integrity.

Git

Java

OpenText Documentum

InfoArchive

SKILLS

Languages: Python, Java, JavaScript, C, SQL

Tools: Git, Jira, Vue, Docker

Protocols: HTTP, TCP, UDP

Other: Web, Software Development

EDUCATION

Software Engineering

2021 - Bachelor, Universidade do Minho, PT

PROJECTS

- **Leonardo** - Updating new interface. From an existing project Leonardo his goal was help the teachers during the class. So I need to adapt there **python** back-end and connect it to the interface written in **Vue**, connecting the 2 applications to become more accessible to the user.
- **Li3-stackoverflow** - This is one of my favorite project. During my scholarship I needed to make a program to parse the data from **stackoverflow** and answer to some queries. First it was written in **C** and the in **Java** to learn how to create a project and adapt it to different languages.

ACTIVITIES / INTERESTS

Gaming enthusiast, love playing **rugby** and hanging out in **nature**. **Movies and series**
